Entered at the postoffice in Tonopah as second class matter.

GET TOGETHER AND BOOST.

This is the time to second the efforts of the mine operators and employees to make a fresh start on the road to prosperity and demonstrate to the world that any misunderstandings that may have occurred between both sides have been adjusted for the good of the community. No matter what differences existed they are of the past, and this is not the time for recrimination or retrospective criticism. What is needed now is the right kind of work to restore Tonopah and the Divide to their places on the map. The suspension of work has not left any animosities or old scores to heal, as there never was any capture of the personal relations between employers and employees. The strike has been called off by an authoritative announcement which appears elsewhere in this issue, and it is believed that when the mine opens tomorrow morning that a large percentage of the old men will respond to the summons. The faith of the investment world in the future of the Divide district has been the subject of wide comment throughout the strike in all financial papers and the circumstances affirm the conviction that the Divide section is on the eve of very important developments. When the mines shut down it was evident that several of the most promising properties where intensive work had been done were at the stage where one more shot might result in bringing in the orebody which was the objective point. The strong companies used their funds to the very best advantage in pushing development in sinking, so that most of them are ready now for beginning lateral work, which would soon eventuate in dividends.

The business men of Tonopah will be encouraged to do as the employers are doing—consider the welfare of the workmen to the end that co-operative effort will bring about a welfare movement by which everybody will be bettered. With silver at \$120, a new era is dawning and the result depends largely on the action of all citizens of Tonopah in getting together and sticking together for mutual benefit.

THE FUTURE OF COPPER.

Under the auspices of the United States Bureau of Mines, an important experiment is being conducted for the utilization of low grade copper ores in small tonnage that is pregnant with the utmost importance to Mineral county and other sections where the low grade carbonate copper ores abound. The experiment is proceeding at Miami, Ariz., on the basis of a 100-ton daily production, and reports from the bureau to date indicate that success is likely to crown the efforts of the officials in charge. Official endorsement of the plan means that Mineral county holdings in the vicinity of Laurier and into Nevada and the small operator and prospector will have an opportunity for realizing on his investment without resorting to the high cost of transportation. There have been but few mentions about the profitable operation of low grade properties such as the 10 and 2 per cent coppers when the product is treated on a scale of magnitude, but that fact did not help the man with limited capital who was constrained to stand idly by without a market for his ores. The 100-ton plant will enable every owner of a low grade copper property to install his own plant and go about his own business with the satisfaction of knowing that he is not contributing the major values to the railroad. The Laurier belt, for instance, is estimated to have millions of tons of copper ore that would come under this classification and the installation of the process now under advisement would mean long life and prosperity to that district and many new districts in Nevada that have not been able to meet the combined smelting and freight charges.

DEMOCRATS SNUB PERSHING.

When congress met to honor General John J. Pershing the democrats were conspicuous for their absence in the official welcome. Vice President Marshall, who was supposed to be present to speak for the senate, was off on a vacation enjoying the hot sands of Atlantic City, so that Senator Albert B. Cummins, president pro tempore, had to make the official senatorial welcome. Speaker Frederick H. Gillett made a masterful address while the democrats were heard by former Speaker Champ Clark whose speech failed to evoke much interest. The absence of Mr. Marshall brings to mind the story of the man who had two sons. One of them became a sailor and the other vice president. He hasn't heard from either of them since.

President Wilson calls the league of nations an "enterprise of Divine mercy." The Declaration of Independence closes with the words, "With a firm reliance on the protection of Divine Providence, we mutually pledge to each other our lives, our fortunes, and our sacred honor." The history of the United States thus far indicates that that reliance was well placed, and the people will be slow to believe that the Almighty has withdrawn His protection from the principles of that Declaration in favor of a pact that destroys their very essence.

The report that Postmaster General Burleson sent his Chinese cook to help sort mail in the postoffice prompts the inquiry, why he wasn't sent to participate in the peace conference.

We think the president was right in selecting Geneva instead of Brussels for the seat of the league. The Swiss Alps are the finest place in the world for gazing at the stars.

Well, when the league is ratified and we get to doing international police work it will give the American boys a fine chance to see a lot of the world, anyhow.

A southerner suggests that the child of internationalism be given a French sort of name, spelling it thus: "Le Ague of Nations."

Wonder if that "six votes to one" had anything to do with Canada's ratifying the treaty without making changes?

Jiggers, the Cop!

AMUSEMENTS

WILLIAM S. HART IN 'THRILLER' TODAY.

Years ago the rodeo was the biggest thing in the west. It was the occasion when all the wild riders, bronco busters and sure shots of the west assembled to display their prowess. Such a scene is revived in "The Money Corral" in which Mr. Hart will be seen at the Butler today. It was written and directed by Mr. Hart himself. Jane Novak is the leading woman, heading an excellent cast. The rodeo scene of this picture was expensive and took lots of time but it justified the effort for it gives a touch of realism that could not otherwise have been secured. Many punchers, Indians, Mexicans, cowboys and others came to Hollywood to make the rodeo scenes and over a thousand persons appeared therein. The opening scenes show wild riding and shooting and all the sports of the cow country. "The Money Corral" is said to be "the most exciting film that has been produced in months. Added to the picture will be Pathe's Topics of the Day."

Tomorrow, May Allison, in "Alone and Married," a comedy delight of New York stage life and "The Lady and the Gentleman," a New Sunshine comedy. Monday, special attraction, "The Money Corral," with Miss Joyce in "The Third Degree."

AMERICA RACING FOR MORE TRADE

(Correspondence Associated Press)

RIO DE JANEIRO, Brazil, Aug. 15.—That countries other than the United States realize the growing commercial importance of Brazil and the value of establishing new lines of trade relations with the largest and perhaps the richest of all South American countries is indicated by the large number of foreign concerns establishing offices or agencies here or seeking federal permission to carry on business in Brazil.

Every steamer from Europe and the United States brings its quota of business representatives who come prepared to embark in business at once or to survey the situation and decide upon the desirability of entering the field.

During the last few months an unusual number of new concerns have been authorized to do business here. These include not only companies organized in Brazil with both local and foreign capital but also many organized and financed in the United States and Europe.

The new enterprises will cover wide fields of activities, ranging from banking, insurance and ship building to the establishment of sea-life resorts. The greater number of them, however, will engage in the business of importing and exporting. One of the new companies is organized with Lisbon and Oporto capital amounting to \$5,000,000, and propose to foster trade between Brazil and Portugal and her colonies in West Africa.

President Wilson is continuing his tour over some of the Balkan states.

That seems to be a regular Chilean habit, down at Santiago.

LITTLE CHANCE FOR TUNGSTEN

A letter received by Fred Luetjens of Reno from the federal minerals relief commission rejecting Luetjens' claim for reimbursement for money spent in mining for tungsten indicates that the small producers of chrome, tungsten and manganese pyrites will not come in for any share of the congressional appropriation made under the minerals relief commission act. The communication received by Luetjens from the commission states that the attorney general has held that unless a specific request to mine for chrome, tungsten or manganese pyrites was made through some representative of the department of interior, war industries board, war trade board, shipping board or the emergency fleet corporation no claims will be allowed for costs of production or exploration. Luetjens' claim was rejected because no showing that he ever was directly requested to mine for tungsten was made.

The claims of all Nevada producers and explorers for the metals covered in the minerals relief commission act probably will be determined.

NOTICE OF APPLICATION FOR PERMISSION TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA.

APPLICATION NO. 5723

Notice is hereby given that on the 10th day of September, 1919, in accordance with Section 54, Chapter 140, of the Statutes of 1913, one W. E. on that particular question. Luetjens operated quite extensively in Humboldt county in a search for tungsten. His claim filed under the minerals relief commission act amounted to about \$6,000.

NEVADA RANKS FOURTH IN YEAR'S GOLD PRODUCTION

According to the report just issued by the government the production of gold and silver in the United States for the calendar year 1918, Nevada is fourth on the list in the production of gold, leading South Dakota by fifty-one ounces only. Nevada is third in the production of silver with 535,960 ounces more than Idaho, which is next in line. The total production for the United States is \$68,446,700 in gold and 67,810,129 ounces of silver, the value of

the latter varying as the price fluctuated during the year.

Compared with the 1917 production—gold \$82,750,700; and silver \$1,746,362 ounces—these figures indicate a reduction in gold output of \$15,044,000 and silver output of 2,826,223 ounces.

YANKEE LEGION TO HOLD STATE CONVENTION

Col. J. G. Scrugham, state chairman of the American Legion, has issued a call for the state convention of the legion to be held in Reno on October 18. Officers of the Nevada branch for the ensuing year will be elected as well as delegates to the national convention which will be held at Minneapolis beginning November 10. The convention will be held in the Commercial club rooms.

SOFT COLLARS BARRED FROM ENGLISH SCHOOL

By Associated Press
LONDON, Sept. 30.—Because they "seem to make for general untidiness in dress" the master of Dulwich college has banned the soft collar. Students at Eton and Harrow are still permitted to wear them.
